JA STOCK MARKET CHALLENGE

PRESENTED BY

Students work hands-on in teams to compete in a live stock market simulation to grow their initial investment into the largest net worth mock stock portfolio.

We are excited to offer an enhanced simulation experience this year to provide new opportunities for students. Schools registered for JA Stock Market Challenge are automatically enrolled in JA Take Stock in Your Future® curriculum. Implementing the curriculum in your classroom will be a significant advantage to your students. They will learn the foundational concepts of stocks and the stock market, explore how stocks are traded, and understand the impact of current events to the market. You can even run test simulations prior to the big day - talk about having the edge over your competition!
